

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Carnegie Investment Grade - class A - SEK

ISIN: SE0000429847

Management Company: Carnegie Fonder AB

Objectives and investment policy

The objective of Carnegie Investment Grade is to create a stable and positive return over a period of 3 years with a risk level on parity with or lower than the Swedish credit market. The fund can invest its assets in interest-bearing securities, money market instruments, fund units and accounts with credit institutions. The fund can also invest in derivative instruments in order to improve the efficiency of the management.

The fund has a Nordic focus, which means that at least 75% of the fund's assets, directly or indirectly, must be invested in instruments issued by companies with a registered office in the Nordic countries or instruments admitted to trading on a regulated market or trading platform within the Nordic region. The average duration of the portfolio is a maximum of 5 years and the average interest rate duration is a maximum of 3 years.

The fund is suitable for those seeking a long-term investment in interest rates. However, investors should be prepared for the value of the fund

to fall in the short term if interest rates rise.

The fund is actively managed without reference to a benchmark.

The currency of the unit class is SEK.

The fund is traded daily. Deposits into and withdrawals from the fund can normally be made on any weekday.

These units are capitalisation units. Income and capital gains are reinvested. The unit class pays no dividends.

Recommendation

This fund may not be appropriate for investors who plan to withdraw their money within 2 years.

Risk and reward profile

What does this synthetic risk and reward indicator mean?

- The units of class A - SEK are classified in category 2 because the value of the unit may be subject to low variations and consequently the risk of loss and the opportunity of gain may be low.
- The risk category for this unit class was calculated using historical data. The risk category may not be a reliable indicator of the unit class's future risk profile. The risk category shown is not guaranteed and may change over time.
- The seven-category scale is complex, for example 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited.

Which materially relevant risks are not adequately captured by the synthetic risk and reward indicator?

- Counterparty risk: the risk that a counterpart does not fulfill its obligations to the fund (e.g. not paying an agreed amount or not delivering securities as agreed).
- Liquidity risk: The risk that part or parts of the fund's assets cannot

be disposed of at the relevant price at a given time. The liquidity risk differs between different types of instrument. For example, the liquidity risk for corporate bonds is normally higher than for shares. If the liquidity of an instrument is low, it may result in the fund being unable to dispose of its holdings, with the result that the redemption request cannot be executed according to the normal schedule. In extraordinary circumstances, if the liquidity of the fund's holdings is so deficient that it cannot be traded or it is not possible to value the fund's assets properly, valuation of a fund may be postponed.

- Operational risk: the risk of loss resulting from e.g. system breakdowns, human errors or from external events.
- Interest risk: Investors should be aware that interest-bearing instruments are associated with an interest risk. This means that adjustments in the fixed income market have a direct impact on the fund's underlying assets. If the interest rate increases, the value of the underlying interest rate instruments decreases.
- Credit risk: the sub-fund invests directly or indirectly in interest bearing instruments, for example bonds. If an issuer of such an instrument cannot pay interest or the nominal amount at maturity, the investment can lose some or all of its value.

How can I get more information about the risks of the fund?

Additional information concerning the risks of investment is indicated in the corresponding sections of the prospectus of the fund.

Charges

The charges you pay are used to cover the running costs of the fund, including the costs of marketing and distribution of units. These charges reduce the potential increase in value of an investment in this fund.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charge	0.50%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The ongoing charges relate to the annual charges; they were calculated on 31.12.2020. The ongoing charges may vary from year to year. The figure of the ongoing charges includes the costs of running the fund (administration), including the costs of marketing and distribution. The figure excludes securities transactions charges.

For further information concerning charges, please consult the fund's prospectus.

Past performance

(1) Change of the investment policy as at 03.06.2019. The result during this period has been achieved under conditions that no longer apply, since the fund's objectives and investment policy have changed.

All charges and fees, except for the entry and exit charges, were taken into account.

The past performance is calculated in SEK.

Past performance is not a reliable indicator of future results.

This fund was launched in 1985 and the unit class in 1985.
