

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Carnegie Micro Cap

ISIN: SE0009495633

Management Company: Carnegie Fonder AB

Objectives and investment policy

The objective of Carnegie Micro Cap is to generate value growth for its unit holders.

The fund is an actively managed equity fund that invests in small companies, mainly in Sweden. The fund is a special (non-UCITS) fund in accordance with the Alternative Investment Fund Managers Act (SFS 2013:10) ("AIFM"). This means the fund has more liberal investment rules than those that apply to UCITS funds, so the fund is allowed to concentrate its holdings to a smaller number of companies than a normal equity fund.

The investments focus on companies that, at the time of investment, have a market value not exceeding 0.1% of the total market capitalisation of the companies listed on NASDAQ OMX Stockholm. A small proportion of the fund's investments, equivalent to a maximum of 10% of the fund's value, can be invested in companies in other Nordic countries. The fund's investment strategy is otherwise diversified and therefore not

limited to particular industries. Investments may be made in derivatives in order to improve management efficiency.

The fund is actively managed without reference to a benchmark.

The currency of the unit class is SEK.

The fund is traded daily. Deposits into and withdrawals from the fund can normally be made on any weekday.

These units are capitalisation units. Income and capital gains are reinvested. The unit class pays no dividends.

Recommendation

This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

What does this synthetic risk and reward indicator mean?

- The units of class are classified in category 6 because the value of the unit may be subject to high variations and consequently the risk of loss and the opportunity of gain may be high.
- The risk category for this unit class was calculated using simulated and historical data. The risk category may not be a reliable indicator of the unit class's future risk profile. The risk category shown is not guaranteed and may change over time.
- The seven-category scale is complex, for example 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 fund is not a risk-free

investment - the risk of losing your money is small, but the chance of making gains is also limited.

Which materially relevant risks are not adequately captured by the synthetic risk and reward indicator?

- Counterparty risk: the risk that a counterparty does not fulfill its obligations to the fund (e.g. not paying an agreed amount or not delivering securities as agreed).
- Liquidity risk: low liquidity might result in that it would be difficult or impossible to buy or sell an investment instrument in a timely manner and that the price could be lower or higher than expected.
- Operational risk: the risk of loss resulting from e.g. system breakdowns, human errors or from external events.

How can I get more information about the risks of the fund?

Additional information concerning the risks of investment is indicated in the corresponding sections of the prospectus of the fund.

Charges

The charges you pay are used to cover the running costs of the fund, including the costs of marketing and distribution of units. These charges reduce the potential increase in value of an investment in this fund.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charge	2.03%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

The ongoing charges relate to the annual charges; they were calculated on 31.12.2020. The ongoing charges may vary from year to year. The figure of the ongoing charges includes the costs of running the fund (administration), including the costs of marketing and distribution. The figure excludes securities transactions charges.

For further information concerning charges, please consult the fund's prospectus.

Past performance

All charges and fees, except for the entry and exit charges, were taken into account.

The past performance is calculated in SEK.

Past performance is not a reliable indicator of future results.

This fund was launched in 2017 and the unit class in 2017.

Practical information

Depositary

Skandinaviska Enskilda Banken AB (publ)
