

SCIENCE BASED TARGETS INITIATIVE

Carnegie Fonder's overarching climate goal has been developed and approved according to the Science Based Target Initiatives (SBTi) methodology. The goal includes the company's direct emissions (scope 1), indirect emissions (scope 2), and value chain emissions (scope 3). The fund company has no direct emissions from its operations, so scope 1 is therefore zero (0). Scope 2 consists of purchased electricity and heating, which are sourced from 100% renewable energy. Over 95% of the fund company's emissions occur in the value chain, i.e., scope 3, where the investment category accounts for 99%. These are the investments the fund company makes in the funds we manage, so our climate goal also includes them.

All investments made by the fund company are included, with deductions for cash, government bonds, municipal bonds, and mortgage bonds, which is in accordance with SBTi's methodology and guidelines. At the turn of the year 2024/2025, the total managed capital was 168 billion SEK, of which 156 billion SEK is covered by the climate goal. For Carnegie Fonder's goal within scope 1 and 2, the first milestone is set to

have 100% of purchased electricity and 90% of energy for heating and cooling from renewable sources by 2025. For the funds' investments, the ultimate goal is to have 100% of the covered capital invested in businesses with an approved Science Based Target by 2040. The first milestone is 2025, where the proportion is set to at least 32%. According to SBTi, this goal is in line with the Paris Agreement's target of a 1.5°C temperature increase and was achieved in 2022.

CLIMATE GOALS	GOAL 2025	2024	2023	STATUS
Scope 1 and 2: Renewable energy in own operations	100%	100%	100%	✓
Scope 3: Share of AUM with verified Science Based Target	32%	53,8%	46,5%	✓
REPORTED EMISSIONS (TCO2E)				2024
Scope 1				0
Scope 2				1.5
<i>Electricity & District Heating</i>				1.5
Scope 3				187,390.4
<i>Investments*</i>				187,320.8
<i>Other</i>				69.6

* excludes financed emissions from the Carnegie Rysslandsfond. Since February 2022, the Moscow Stock Exchange has been closed to foreign investors, and therefore the Carnegie Rysslandsfond is also closed for trading.

INVESTMENTS IN FOSSIL FUELS

In accordance with Carnegie Fonder's commitment to the Science Based Target Initiative, we also report the investments made related to fossil fuels. Most of our funds exclude companies that derive more than five percent of their revenue from fossil fuels. The fund company's exclusion criteria can be found here. Below, we report the investments in fossil activities as of 31-12-2024.

SECTOR	MARKET VALUE (MSEK)	SHARE OF AUM
Oil & Gas Producers	0	0%
Oil & Gas Services & Equipment	0	0%
Oil & Gas Supply Chain	67,331,372	0.04%
<i>Total</i>	67,331,372	0.04%

OUTCOME CLIMATE GOALS: Share of AUM with approved targets and commitments on SBT

CARBON FOOTPRINT

Carnegie Fonder measures the carbon footprint of our funds in accordance with the recommendation developed by the Swedish Investment Fund Association. The recommendation is in line with the TCFD's recommendations for carbon-weighted intensity, which is the measure TCFD recommends asset managers to report.

CARBON FOOTPRINT PER FUND*	2016	2017	2018	2019	2020	2021	2022	2023	2024
