## WHAT IS THIS PRODUCT?

#### Type

The fund is a special fund pursuant to the Swedish Alternative Investment Fund Managers Act (2013:561).

#### Term

This fund has no maturity date. However, the manufacturer may decide to close the fund under certain circumstances.

#### Objectives

The objective of Carnegie Micro Cap is to primarily generate value growth for its unit holders.

The fund is an actively managed equity fund. The fund has more liberal investment rules than those that apply to UCITS funds, so the fund is allowed to concentrate its holdings to a smaller number of companies than a normal equity fund.

The investments focus on small companies with headquarter in Sweden that, at the time of investment, have a market value not exceeding 0.1% of the total market capitalisation of the companies listed on NASDAQ OMX Stockholm. A small proportion of the fund's investments, equivalent to a maximum of 10% of the fund's value, can be invested in companies in other Nordic countries. The fund's investment strategy is otherwise diversified and therefore not limited to particular industries. Investments may be made in derivatives in order to improve management efficiency.

**Benchmark:** The product compares its performance to Carnegie Micro Cap Return as it is well aligned with the fund's investment policy. The product does not attempt to replicate this benchmark index and freely chooses the securities in which it invests. The deviation from this benchmark may be significant.

#### Intended investor

This fund may be suitable for investors who plan to hold their investment for at least 5 years and who are aware that the money invested in the fund can both increase and decrease in value and that there is no guarantee that the entire capital invested can be returned. No special knowledge or experience in investment funds or financial markets is required to invest in the fund.

#### Other information

**Depository:** Skandinaviska Enskilda Banken AB (publ)

**Dividend income:** This unit class is a capitalisation class meaning that income is reinvested. The unit class pays no dividends.

**Conversion right:** The investor has the right to convert his investment in units for units in the same fund. The investor can obtain information about how to convert in the prospectus of the fund.

**Additional information:** Additional information about the fund, the prospectus, the latest annual and semi-annual report and the latest prices of units may be obtained free of charge from the alternative investment fund manager or on <https://www.carnegiefonder.se/en/>. The prospectus and the periodic reports are prepared for the entire fund and are available in English. The alternative investment fund manager may inform you about other languages in which these documents are available.

This fund was launched in 2017.

The currency of the fund is SEK.

# WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

## Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Risks not captured by the risk indicator:

Liquidity risk: Low liquidity can make it difficult or impossible to buy or sell securities in reasonable time. Price may be lower or higher than expected.

This product does not include any protection from future market performance so you could lose some or all of your investment.

## Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

**Recommended holding period: 5 years**

**Example investment: 100,000 SEK**

		If you exit after 1 year	If you exit after 5 years (recommended holding period)
<b>Scenarios</b>			
<b>Minimum</b>	<b>There is no minimum guaranteed return. You could lose some or all of your investment.</b>		
<b>Stress</b>	<b>What you might get back after costs</b>	35,800 SEK	25,100 SEK
	Average return each year	-64.2 %	-24.2 %
<b>Unfavourable</b>	<b>What you might get back after costs</b>	65,200 SEK	79,900 SEK
	Average return each year	-34.8 %	-4.4 %
<b>Moderate</b>	<b>What you might get back after costs</b>	115,900 SEK	207,200 SEK
	Average return each year	15.9 %	15.7 %
<b>Favourable</b>	<b>What you might get back after costs</b>	217,900 SEK	345,100 SEK
	Average return each year	117.9 %	28.1 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and of a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an investment between December 2021 and May 2025.

Moderate scenario: This type of scenario occurred for an investment between November 2017 and November 2022, by referring to a benchmark.

Favourable scenario: This type of scenario occurred for an investment between April 2016 and April 2021, by referring to a benchmark.

The stress scenario shows what you might get back in extreme market circumstances.

# WHAT HAPPENS IF CARNEGIE FONDER AB IS UNABLE TO PAY OUT?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Skandinaviska Enskilda Banken AB (publ). Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

## WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment. If the fund is part of another product, e.g. unit-linked insurance, there may be other costs for that product.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 100,000 SEK is invested

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	2,050 SEK	19,030 SEK
Annual cost impact (*)	2.1 %	2.0 % each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 17.8% before costs and 15.7% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

**Composition of costs** (amounts in SEK are based on an investment of 100,000 SEK)
