WHAT IS THIS PRODUCT?

Type

The fund is a UCITS fund pursuant to the Swedish Investment Funds Act (2004:46).

Term

This fund has no maturity date. However, the board of directors may decide to close the fund under certain circumstances.

Objectives

The aim of the fund is to generate high long-term returns at lower risk than pure equity funds through investments in equities without limitation with regard to company or sector.

The fund may invest its assets in transferable securities, money market instruments, derivatives, fund units and accounts with credit institutions.

With regard to the equity component, the fund may invest its assets in global and Swedish equities with no restrictions as to company or sector and in funds or fund companies with focus on equities.

With regard to the fixed income-related component, the fund may invest its assets in fixed income funds. The majority of the funds will be focused on Nordic or Nordic-related financial instruments.

The proportions of equity-related financial instruments and fixed income funds held by the fund may vary depending on market conditions, but the share of equity-related financial instruments is an estimated 50-70% over time. The fund's investments in other investment funds and fund companies may not exceed 50%.

The fund is permitted to invest its assets in derivative instruments whose underlying assets consist of or are attributable to transferable securities, money market instruments, financial indices, interest rates, exchange rates or foreign currencies.

Benchmark: The product compares its performance with 48% MSCI World Net Total Return, 12% SIX Portfolio Return, 40% Solactive SEK IG Credit, as it is in line with the fund's investment strategy. The product does not attempt to replicate this benchmark index and freely chooses which securities it invests in. The deviation from this benchmark index can be significant.

Intended investor

This fund may be suitable for investors who plan to hold their investment for at least 5 years and who are aware that the money invested in the fund can both increase and decrease in value and that there is no guarantee that the entire capital invested can be returned. No special knowledge or experience in investment funds or financial markets is required to invest in the fund.

Other information

Depository: Skandinaviska Enskilda Banken AB (publ)

Dividend income: This unit class is a capitalisation class meaning that income is reinvested. The unit class pays no dividends.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

pared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Risks not captured by the risk indicator:

Currency risk: Currency exposure can potentially lead to a loss due to fluctuation in foreign currency.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The summary risk indicator is a guide to the level of risk of this product com-

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: 5 years

Example investment: 100,000 SEK

If you exit after 1 year

If you exit after 5 years (recommended holding period)

| Scenarios | | If you exit after 1 year | If you exit after 5 years (recommended holding period) |
|---------------------|--|--------------------------|--|
| Minimum | There is no minimum guaranteed return. You could lose some or all of your investment. | | |
| Stress | What you might get back after costs | 63,400 SEK | 60,800 SEK |
| | Average return each year | -36.6% | -9.5% |
| Unfavourable | What you might get back after costs | 92,500 SEK | 100,800 SEK |
| | Average return each year | -7.5% | 0.2% |
| Moderate | What you might get back after costs | 107,100 SEK | 140,900 SEK |
| | Average return each year | 7.1% | 7.1% |
| Favourable | What you might get back after costs | 123,700 SEK | 153,800 SEK |
| | Average return each year | 23.7% | 9.0% |

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and of a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an investment between December 2024 and December 2025.

Moderate scenario: This type of scenario occurred for an investment between September 2019 and September 2024, by referring to a benchmark.

Favourable scenario: This type of scenario occurred for an investment between April 2016 and April 2021, by referring to a benchmark.

The stress scenario shows what you might get back in extreme market circumstances.

WHAT HAPPENS IF CARNEGIE FONDER AB IS UNABLE TO PAY OUT?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depository Skandinaviska Enskilda Banken AB (publ). Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment. If the fund is part of another product, e.g. unit-linked insurance, there may be other costs for that product.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 100,000 SEK is invested

| | If you exit after 1 year | If you exit after 5 years |
|------------------------|--------------------------|---------------------------|
| Total costs | 1,630 SEK | 11,054 SEK |
| Annual cost impact (*) | 1.6% | 1.6% each year |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.7% before costs and 7.1% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs (amounts in SEK are based on an investment of 100,000 SEK)

| One-off costs upon entry or exit | | If you exit after 1 year |
