### WHAT IS THIS PRODUCT?

#### Type

The fund is a UCITS fund pursuant to the Swedish Investment Funds Act (2004:46).

#### Term

This fund has no maturity date. However, the board of directors may decide to close the fund under certain circumstances.

#### Objectives

The fund's objective is to generate daily return corresponding to 150% of the daily change of the OMX Stockholm 30 ESG Responsible Gross Index ("the index").

The objective means that if the index rises by 1%, the net asset value of the fund (NAV) will increase by 1.5% and if the index falls by 1%, NAV will decrease by 1.5%.

The fund buys equities and uses exchange-traded index futures to create exposure geared against the OMX Stockholm 30 ESG Responsible Gross Index. The fund's holdings are adjusted if the exposure against the index deviates from 150% of NAV by more than 5 percentage points.

The fund may invest its assets mainly in equity-related transferable securities, derivative instruments, fund units and deposits to accounts with credit institutions.

A maximum of 10% of fund assets may be invested in shares in other funds.

**Benchmark:** The portfolio is actively managed without reference to a benchmark.

#### Intended investor

The fund is suitable for the investor who believes that the Swedish stock market will have a strong development and who is aware of the risk of declines in the share value are high. The fund is suitable for a saver who plans to keep the investment in at least five years. The fund's daily leverage means that strong stock market fluctuations will have a negative impact on the fund's share value. No special knowledge or experience in investment funds or financial markets is required to invest in the fund.

#### Other information

# WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

## Risk indicator

pared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Risks not captured by the risk indicator:

Liquidity risk: Low liquidity can make it difficult or impossible to buy or sell securities in reasonable time. Price may be lower or higher than expected.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The summary risk indicator is a guide to the level of risk of this product com-

## Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

**Recommended holding period: 5 years**

**Example investment: 100,000 SEK**

		If you exit after 1 year	If you exit after 5 years (recommended holding period)
<b>Scenarios</b>			
<b>Minimum</b>	<b>There is no minimum guaranteed return. You could lose some or all of your investment.</b>		
<b>Stress</b>	<b>What you might get back after costs</b>	9,430 SEK	7,890 SEK
	Average return each year	-90.6 %	-39.8 %
<b>Unfavourable</b>	<b>What you might get back after costs</b>	72,900 SEK	85,900 SEK
	Average return each year	-27.1 %	-3.0 %
<b>Moderate</b>	<b>What you might get back after costs</b>	112,620 SEK	164,620 SEK
	Average return each year	12.6 %	10.5 %
<b>Favourable</b>	<b>What you might get back after costs</b>	185,290 SEK	258,850 SEK
	Average return each year	85.3 %	21.0 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an investment between December 2021 and January 2023.

Moderate scenario: This type of scenario occurred for an investment between

November 2015 and November 2020.

Favourable scenario: This type of scenario occurred for an investment between June 2016 and June 2021.

The stress scenario shows what you might get back in extreme market circumstances.

## WHAT HAPPENS IF CARNEGIE FONDER AB IS UNABLE TO PAY OUT?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Skandinaviska Enskilda Banken AB (publ). Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

## WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment. If the fund is part of another product, e.g. unit-linked insurance, there may be other costs for that product.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 100,000 SEK is invested

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	1,140 SEK	8,675 SEK
Annual cost impact (*)	1.1 %	1.1 % each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.8% before costs and 10.5% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

**Composition of costs** (amounts in SEK are based on an investment of 100,000 SEK)
