WHAT IS THIS PRODUCT?

Type

Investment Company (SICAV), Luxembourg

Term

This sub-fund has no maturity date. However, the board of directors may decide to close the sub-fund under certain circumstances.

Objectives

The sub-fund's investment objective is to invest as a Feeder Fund at least 85% in Carnegie Strategiefond (the "Master") (SE0000429813), a UCITS fund registered with the Swedish Act on Investment Funds open to private pension savings pursuant to the Swedish Individual Pension Savings Act.

Therefore the investment policy of the sub-fund shall be read in conjunction with the prospectus of the Master, the objectives and investment policy being the following: The investment objective is to invest its assets in transferable securities, money market instruments, fund units and accounts with credit institutions. The fund's assets must primarily be invested in Nordic or Nordic-related financial instruments. The fund's assets may also to a limited extent be invested in interest-bearing financial instruments with exposure outside the Nordic region. The Master is actively managed and does not have a benchmark index. Financial instruments are selected based upon individual assessments. The objective of the fund is to provide a maximum long-term return given the fund's level of risk.

The Master may invest a maximum of 10% of its value in fund units. The Master's assets may also be invested in transferable securities and money market instruments, up to a maximum of 10% of the value of its assets.

The Master may invest in derivatives. Derivatives may be used to improve the efficiency of the management and thereby increase the return and generate leverage. The Master may invest in OTC derivatives. The Master may make use of currency derivatives to partly or entirely hedge its holdings. The Master may enter into agreements regarding securities loans.

The sub-fund may invest a substantial portion of its portfolio in cash or cash related instruments at any time.

The sub-fund qualifies as an Article 8 product under SFDR (Sustainable Finance Disclosure Regulation) since Master's investment Policy promotes environment, social, and governance characteristics ("ESG Goals"). The Investment Manager integrates these characteristics into the Master's investment strategy to better manage risk and generate sustainable long-term returns. Further

disclosures describe the specific risks of investing in this sub-fund and what investment strategies are utilized by the Investment Manager to promote the sustainability characteristics as outlined in the prospectus or can be found on <https://www.carnegiefonder.se/en/>.

Benchmark: The portfolio is actively managed without reference to a benchmark.

Intended retail investor

This fund may be suitable for savers who plan to hold their investment for at least 5 years and who are aware that the money invested in the fund can both increase and decrease in value and that there is no guarantee that the entire capital invested can be returned. No special knowledge or experience in investment funds or financial markets is required to invest in the fund.

Other information

Depository: Skandinaviska Enskilda Banken. AB (publ) – Luxembourg Branch

Dividend income: This unit class is a capitalisation class meaning that income is reinvested.

Conversion right: The investor has the right to convert his investment in units in one sub-fund for units in the same sub-fund or in another sub-fund. The investor can obtain information about how to convert in the prospectus of the fund.

Segregation: The assets and liabilities of a sub-fund are segregated pursuant to the law so that the commitments and liabilities of one sub-fund do not affect the other sub-funds.

Additional information: Additional information about the fund, copies of its prospectus, the latest annual and semi-annual report and the latest prices of units may be obtained free of charge from the management company or on <https://fondsfinder.universal-investment.com>. The prospectus and the periodic reports are prepared for the entire fund and are available in English. The management company may inform you about other languages in which these documents are available.

This sub-fund was launched in 1990 and this unit class in 2017.

The currency of the sub-fund is SEK. The currency of the unit class is NOK. For this unit class, the foreign-exchange risk of the unit currency is systematically hedged against the sub-fund's currency.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: 5 years

Example investment: 100,000 NOK

		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	39,000 NOK	47,800 NOK
	Average return each year	-61.0 %	-13.7 %
Unfavourable	What you might get back after costs	88,700 NOK	112,400 NOK
	Average return each year	-11.3 %	2.4 %
Moderate	What you might get back after costs	109,300 NOK	155,800 NOK
	Average return each year	9.3 %	9.3 %
Favourable	What you might get back after costs	140,900 NOK	182,200 NOK
	Average return each year	40.9 %	12.8 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and of a suitable reference class over the last 10 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an investment be-

tween December 2023 and December 2024.

Moderate scenario: This type of scenario occurred for an investment between January 2015 and January 2020, by referring to a benchmark.

Favourable scenario: This type of scenario occurred for an investment between July 2016 and July 2021.

The stress scenario shows what you might get back in extreme market circumstances.

WHAT HAPPENS IF Universal-Investment-Luxembourg S.A. IS UNABLE TO PAY OUT?

The failure of the manufacturer will have no direct impact on your payment, since statutory regulations require that, if the manufacturer becomes insolvent, the fund does not become part of the insolvency assets, but rather remains separate.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 100,000 NOK is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	1,440 NOK	10,550 NOK
Annual cost impact (*)	1.4 %	1.4 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.7% before costs and 9.3% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
