# WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

## Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

## WHAT HAPPENS IF CARNEGIE FONDER AB IS UNABLE TO PAY OUT?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Skandinaviska Enskilda Banken AB (publ). Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

## WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment. If the fund is part of another product, e.g. unit-linked insurance, there may be other costs for that product.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 100,000 SEK is invested

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	1,440 SEK	9,516 SEK
Annual cost impact (*)	1.4 %	1.4 % each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.9% before costs and 6.5% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
